

Unlocking the Digital Potential of Rural

Georgia

Unlocking the digital potential for rural small businesses across the country could add \$47 billion to the U.S. GDP per year. For Georgia, it could add \$2,207 million to the state GDP per year, according to a new study by the U.S. Chamber of Commerce and Amazon. The study estimates the economic impact of digital technologies on rural small businesses based on official statistics and a survey to more than 5,000 rural small businesses across the country.

State Stats

How to Unlock the Digital Potential of Rural Georgia

Increase digital connectivity in rural areas.

66% of rural small businesses say poor internet or cell phone connectivity negatively impacts their business.

Increase the talent pipeline of candidates trained in digital skills (cloud, digital marketing).

38% of rural small businesses say they can't hire the talent with the right digital skills in their area.

Increase adoption of digital training and digital tools by rural small businesses so they can scale their operations.

Nearly 41% of rural small businesses agree that policymakers should create incentive programs that make it easier for rural small businesses to incorporate digital technology into their daily operations.
